(54) Title: METHOD OF MANUFACTURING OPTICAL FILM

(57) Abstract: To provide a method of
manufacturing an optical film formed
on a plastic substrate. There is provided
a method of manufacturing an optical
film including the steps of laminating
a separation layer and an optical filter
on a first substrate, separating the
optical filter from the first substrate,
attaching the optical filter to a second
substrate. Since the optical film
manufactured according to the invention
has flexibility, it can be provided on
a portion or a display device having a
curved surface. Further, the optical film

is not processed at high temperatures, and hence, an optical film having high yield with high reliability can be formed. Furthermore,
an optical film having an excellent impact resistance property can be formed.
